The popularity of live streaming services like TikTok is contributing to younger children needing to access specialist help after being exploited online. Predators use these services to contact youngsters via comments or messaging tools. A recent survey by YouGov found that 57% of 12 year olds admitted to live streaming content over the internet and using Apps intended for users aged 13 and over. It is vitally important that parents understand what apps children are using and know the risks associated with them.

I hope you all have a lovely half term break and look forward to seeing you all refreshed when we come back on Monday 25 February.
